Let's Know Each Other

1

Name and role

2

SME or industry context

3

Accounting-system experience

4

One outcome you want today

Ground Rules

1

Participate and ask questions

2

Respect different experience levels

3

Keep phones silent and data confidential

4

Return from breaks on time

The Orchid Bay Trading Learning Journey

Course Outline

1

Topic 1: Introduction to QuickBooks Online Plus Accounting System

2

Topic 2: Input Data to QuickBooks

3

Topic 3: Manage Goods and Services Tax (GST)

4

Topic 4: Financial and Accounting Reports

Learning Outcomes

1

LO1: Configure and import relevant data to the QuickBooks accounting system.

2

LO2: Input and control day-to-day sales, purchasing, banking and inventory data in QuickBooks.

3

LO3: Compute and review GST for expenses and invoices using appropriate Singapore tax codes.

4

LO4: Generate and interpret financial, accounting, ageing and GST reports for SME decisions.

Skills Framework Alignment

1

A1: Retrieve relevant data from other systems in the organisation.

2

A2: Input data into the accounting system.

3

A3: Use the system to determine and calculate supplier and vendor GST payables and receivables.

4

A4: Use the system to generate reports on corporate tax expenditure, assets and liabilities.

One-Day Lesson Plan

Briefing for Assessment

1

Individual assessment; no discussion

2

Open book: course materials only

3

Phones and other materials under the table

4

Use own words; follow appeal and reassessment process

Assessment and Funding

1

WA (SAQ): 60 minutes

2

Oral Questioning: current paper 25 minutes

3

Competent requires all criteria met

4

At least 75% attendance and assessment completion

Assessment Flow

TOPIC 1 · A1 · K1

Introduction to QuickBooks Online Plus Accounting System

Cloud accounting · company setup · master data · governance

Key Concepts

1

Accounting-system choices and the role of cloud accounting in an SME control environment.

2

Company settings, financial year, GST profile, home currency and user-access design.

3

A governed migration sequence for chart of accounts, customers, suppliers and products/services.

4

Opening-balance controls: cut-off, completeness, mapping, reconciliation and sign-off.

From source document to decision

Accounting systems an SME may encounter

1

Manual records — low cost, weak control at scale

2

Desktop accounting — local control, limited collaboration

3

Cloud accounting — shared, current records

4

ERP — integrated processes across functions

What QuickBooks Online manages

1

Sales and receivables

2

Purchases and payables

3

Banking and reconciliation

4

Inventory, GST and reporting

Cloud accounting control model

QuickBooks ecosystem

1

Core ledger and subledgers

2

Bank connections and imports

3

App integrations

4

Accountant collaboration

Select a plan by requirements

1

Transaction volume

2

Number and roles of users

3

Inventory and purchase orders

4

Reporting and automation needs

Company setup decisions

1

Legal and customer-facing identity

2

Financial year and accounting method

3

GST registration details

4

Home currency and multi-currency decision

Multi-currency is a governance decision

1

Confirm business need

2

Set the correct home currency first

3

Understand exchange-rate effects

4

Document irreversible or plan-specific settings

User roles and segregation of duties

1

Primary administrator

2

Company administrator

3

Standard user with scoped access

4

Reports-only/accountant access where available

Chart of Accounts is the reporting spine

1

Account type drives report placement

2

Detail type supports classification

3

Code and name support consistency

4

Inactive accounts preserve history

Design a usable account structure

1

Stable coding convention

2

Right level of detail

3

Avoid duplicate meaning

4

Map legacy accounts before import

Master-data quality gate

Customer and supplier records

1

Unique display name and contact

2

Terms and opening balance cut-off

3

GST and currency attributes

4

Duplicate prevention and ownership

Products and services records

1

Inventory item

2

Non-inventory item

3

Service item

4

Bundle/category where available

Inventory item accounting map

Opening balances need evidence

1

Trial balance at cut-off

2

AR/AP detail matches control totals

3

Bank statement agrees to cash

4

Inventory quantity and value are supported

Migration control totals

1

Record count

2

Debit/credit totals

3

Opening balance totals

4

Exception log and sign-off

Import or enter manually?

1

Use import for clean repeatable lists

2

Use manual entry for low volume

3

Test a small sample first

4

Retain the source and import result

Topic 1 control checkpoint

A successful setup is not just complete; it is reconciled, access-controlled and explainable.

Use evidence · preserve audit trail · escalate uncertainty

Set Up the SME Company and Control Profile

BUSINESS OBJECTIVE

Create a controlled QuickBooks company profile for Orchid Bay Trading Pte Ltd.

DELIVERABLE

Company profile evidence, GST and financial-year settings, user-access matrix and setup sign-off.

Legal identity and financial year match the scenario

GST profile is documented

Home currency decision is approved

Access roles follow least privilege

Detailed procedure and evidence workbook: [activities/activity-01-company-setup-and-controls/](#)

Clean and Import Master Data

BUSINESS OBJECTIVE

Prepare, validate and import the chart of accounts, customers, suppliers and products/services.

DELIVERABLE

Import-ready CSV files, control totals, import results and exception log.

All source files pass the quality checks

Counts reconcile before and after import

No duplicate display names remain

Account and item mappings are supportable

Detailed procedure and evidence workbook: [activities/activity-02-master-data-import/](#)

Topic 1 Recap

1

Accounting-system choices and the role of cloud accounting in an SME control environment.

2

Company settings, financial year, GST profile, home currency and user-access design.

3

A governed migration sequence for chart of accounts, customers, suppliers and products/services.

4

Opening-balance controls: cut-off, completeness, mapping, reconciliation and sign-off.

TOPIC 2 · A2 · K2

Input Data to QuickBooks

Banking · sales · purchases · inventory · recurring transactions

Key Concepts

1

A source-document-to-ledger cycle for bank, sales, purchasing and inventory transactions.

2

Accounts receivable from estimate through invoice, receipt, credit and overdue follow-up.

3

Accounts payable from purchase order through bill, payment, supplier credit and recurring expense.

4

Control points for duplicate prevention, approvals, audit trail, class/location and reconciliation.

Transaction lifecycle

Bank feeds and file imports

1

Connection can reduce rekeying

2

CSV import supports controlled batches

3

Downloaded does not mean correctly posted

4

Review every match, add and exclusion

Banking rule of evidence

The bank feed is a source; the ledger classification and reconciliation are the control.

Use evidence · preserve audit trail · escalate uncertainty

Add a bank account correctly

1

Correct account type

2

Clear account name and number

3

Opening date and balance evidence

4

Owner and reconciliation frequency

Match, add or exclude

1

Match an existing transaction

2

Add a genuine new transaction

3

Exclude non-business or duplicate feed lines

4

Document exceptions before posting

Deposit, cheque and transfer

1

Deposit records money received

2

Cheque/expense records money paid

3

Transfer moves value between own accounts

4

Each needs date, account and evidence

Bank reconciliation equation

Reconciliation differences

1

Wrong date or amount

2

Duplicate or missing transaction

3

Uncleared item

4

Opening-balance or bank-charge issue

Sales cycle

Estimate, invoice or sales receipt?

1

Estimate — non-posting offer

2

Invoice — sale on credit

3

Sales receipt — immediate payment

4

Credit note — reduces customer balance

Invoice quality controls

1

Correct customer and date

2

Accurate product, quantity and price

3

Terms and tax code

4

Unique document number and supporting evidence

Custom form styles

1

Brand identity and contact details

2

Readable item and tax information

3

Consistent payment terms

4

Preview before use

Receive and apply payment controls

Manage overdue invoices

1

Review ageing buckets

2

Prioritise material exposures

3

Document collection action

4

Escalate disputes and credit risk

Purchasing cycle

Expense, bill or cheque?

1

Expense — paid now

2

Bill — pay later

3

Cheque — payment instrument

4

Purchase order — commitment, not expense

Three-way matching

Supplier credits

1

Record the supplier credit

2

Apply it to open bills

3

Preserve original documents

4

Verify AP control balance

Recurring transactions

1

Use for predictable repeated entries

2

Set schedule and end condition

3

Choose reminder or automatic mode

4

Review templates periodically

Inventory quantity and value

1

Purchase increases quantity/value

2

Sale reduces quantity and recognises COGS

3

Adjustment needs reason and authorisation

4

Negative stock is a control warning

Class and location tracking

1

Class answers what activity

2

Location answers where

3

Use a stable taxonomy

4

Review unclassified transactions

Audit log as detective control

1

Who changed what

2

When the change occurred

3

Deleted or voided transactions

4

User patterns requiring review

Internal control pattern

Topic 2 control checkpoint

Fast data entry is useful only when source evidence, approval and reconciliation remain intact.

Use evidence · preserve audit trail · escalate uncertainty

Import Banking Data and Reconcile January

BUSINESS OBJECTIVE

Set up bank accounts, import statement lines and reconcile the January statement.

DELIVERABLE

Imported bank batch, classified transactions, reconciliation report and exception log.

Imported row count matches the source

Every line is matched, added or excluded with a reason

Transfer is recorded once

Reconciliation difference is zero

Detailed procedure and evidence workbook: [activities/activity-03-banking-and-reconciliation/](#)

Process the Sales and Receivables Cycle

BUSINESS OBJECTIVE

Process an estimate, invoice, sales receipt, payment, customer credit and overdue follow-up.

DELIVERABLE

Complete customer transaction chain, AR ageing evidence and collection action log.

Estimate-to-invoice chain is intact

Payment and credit are applied correctly

GST is consistent with source documents

AR ageing actions are specific and evidenced

Detailed procedure and evidence workbook: [activities/activity-04-sales-and-receivables/](#)

Process Purchasing and Payables

BUSINESS OBJECTIVE

Process purchase orders, supplier bills, payments, supplier credits and recurring expenses.

DELIVERABLE

Approved procure-to-pay chain, AP ageing evidence and recurring-template control.

Three-way match is documented

Bill and payment retain source references

Supplier credit is applied

Recurring template has an owner and review date

Detailed procedure and evidence workbook: [activities/activity-05-purchasing-and-payables/](#)

Control Inventory, Classes, Locations and Audit Trail

BUSINESS OBJECTIVE

Review inventory movements, classification quality and audit-log evidence.

DELIVERABLE

Inventory roll-forward, unclassified-transaction report and audit-log review.

Inventory roll-forward reconciles

Unclassified items are resolved or logged

Audit samples identify user and change

Corrective actions have owner and due date

Detailed procedure and evidence workbook: [activities/activity-06-inventory-classes-audit/](#)

Topic 2 Recap

1

A source-document-to-ledger cycle for bank, sales, purchasing and inventory transactions.

2

Accounts receivable from estimate through invoice, receipt, credit and overdue follow-up.

3

Accounts payable from purchase order through bill, payment, supplier credit and recurring expense.

4

Control points for duplicate prevention, approvals, audit trail, class/location and reconciliation.

TOPIC 3 · A3 · K3 · K4

Manage Goods and Services Tax (GST)

Singapore GST · tax coding · input/output tax · GST F5 review

Key Concepts

1

GST-registered businesses charge output tax and may claim eligible input tax under IRAS rules.

2

Use the correct current QuickBooks tax code for standard-rated, zero-rated, exempt and out-of-scope items.

3

Reconcile GST detail, exception and control accounts before preparing GST F5 figures.

4

Escalate uncertain treatments; accounting software supports preparation but does not replace tax advice.

GST in the value chain

Current Singapore GST rate

The standard rate is 9% at publication; always verify time-sensitive tax rates and rules with IRAS.

Use evidence · preserve audit trail · escalate uncertainty

Taxable and non-taxable treatment

1

Standard-rated supply

2

Zero-rated supply

3

Exempt supply

4

Out-of-scope transaction

Output tax and input tax

1

Output tax is collected on taxable sales

2

Input tax may be claimable on eligible business purchases

3

Net output above input generally means payable

4

Net input above output may mean refundable, subject to IRAS rules

GST control formula

Tax-inclusive and tax-exclusive amounts

1

Exclusive: $\text{GST} = \text{net} \times \text{rate}$

2

Inclusive: $\text{GST} = \text{gross} \times \text{rate} \div (1 + \text{rate})$

3

Rounding policy must be consistent

4

Source document must support treatment

GST coding decision

GST on sales

1

Correct supply category

2

Valid tax invoice information

3

Credit note reverses original treatment

4

Foreign-currency conversion is documented

GST on purchases

1

Business purpose

2

Valid supporting document

3

Claim eligibility

4

Correct period and tax code

Common GST coding risks

1

Using standard rate by default

2

Claiming blocked/private expenses

3

Mixing exempt and out-of-scope

4

Back-dated changes after filing

GST control accounts

1

Output GST collected

2

Input GST claimable

3

GST payable/refundable

4

Reconcile to GST detail and general ledger

GST F5 preparation flow

Exception-report review

1

Transactions without tax

2

Unusual tax code by account

3

Negative or duplicate amounts

4

Changes to prior filed periods

GST reconciliation

When errors are found

1

Quantify affected periods

2

Preserve an audit trail

3

Correct through an approved method

4

Consult current IRAS guidance

Corporate tax context

1

Accounting profit is not chargeable income

2

Current corporate tax rate is 17%

3

Tax adjustments and reliefs are time-sensitive

4

Use IRAS guidance or a qualified adviser

Records support compliance

1

Source documents

2

Ledger and reconciliations

3

Approval evidence

4

Filed return and payment evidence

Topic 3 control checkpoint

Correct GST reporting begins at transaction coding and ends with an evidenced reconciliation.

Use evidence · preserve audit trail · escalate uncertainty

Code and Validate GST Transactions

BUSINESS OBJECTIVE

Apply and validate Singapore GST treatment across a mixed transaction set.

DELIVERABLE

GST coding register, calculation checks and resolved exception log.

Every transaction has a supported classification

Formula checks agree to system tax amounts

Uncertain items are escalated

Credits mirror original tax treatment

Detailed procedure and evidence workbook: [activities/activity-07-gst-coding-control/](#)

Prepare the GST F5 Review Pack

BUSINESS OBJECTIVE

Reconcile GST ledgers and prepare a review pack for the quarterly GST return.

DELIVERABLE

GST summary/detail reconciliation, exception report and reviewer sign-off pack.

GST detail agrees to control accounts

F5 control figures are formula-driven

Sample evidence is traceable

Preparer and reviewer sign-offs are complete

Detailed procedure and evidence workbook: [activities/activity-08-gst-f5-review/](#)

Topic 3 Recap

1

GST-registered businesses charge output tax and may claim eligible input tax under IRAS rules.

2

Use the correct current QuickBooks tax code for standard-rated, zero-rated, exempt and out-of-scope items.

3

Reconcile GST detail, exception and control accounts before preparing GST F5 figures.

4

Escalate uncertain treatments; accounting software supports preparation but does not replace tax advice.

TOPIC 4 · A4 · K5

Financial and Accounting Reports

P&L · balance sheet · cash flow · ageing · GST · custom reports

Key Concepts

1

Profit and Loss explains performance over a period; Balance Sheet explains position at a date.

2

Cash flow, profit and working capital answer different management questions.

3

AR/AP ageing turns overdue balances into collection and payment priorities.

4

Report accuracy depends on reconciled source data, correct basis, period, filters and review evidence.

Reports turn entries into decisions

Profit and Loss anatomy

P&L review questions

1

Which revenue streams changed

2

What drove gross margin

3

Which expenses are unusual

4

Are period and accounting basis correct

Balance Sheet equation

$$\text{Assets} = \text{Liabilities} + \text{Owners' Equity}$$

Use evidence · preserve audit trail · escalate uncertainty

Balance Sheet structure

1

Current and non-current assets

2

Current and non-current liabilities

3

Equity and retained earnings

4

Control accounts requiring reconciliation

Balance Sheet limitations

1

Snapshot at one date

2

Book value may differ from market value

3

Unrecorded intangibles may matter

4

Classification quality affects interpretation

P&L versus Balance Sheet

1

P&L covers a period

2

Balance Sheet is at a date

3

Profit changes retained earnings

4

Cash is not the same as profit

Cash flow versus profit

1

Profit uses accrual accounting

2

Cash flow tracks cash movements

3

Credit sales can raise profit before cash

4

Asset purchases use cash but are not immediately expensed

AR ageing

1

Current

2

1–30 days overdue

3

31–60 days overdue

4

61+ days overdue

Use ageing to manage credit

AP ageing

1

Protect supplier terms

2

Avoid duplicate payment

3

Plan cash requirements

4

Resolve disputed bills

GST reports

1

GST summary

2

GST detail

3

Exception report

4

Return preparation view

Report parameters matter

1

Date range and as-of date

2

Cash or accrual basis

3

Classes, locations and filters

4

Comparison period and rounding

Custom reports

Scheduled reports need controls

1

Review recipient access

2

Use an approved cadence

3

Protect confidential attachments

4

Revalidate after chart/config changes

Report validation

SME management pack

1

P&L with prior-period comparison

2

Balance Sheet with key reconciliations

3

AR/AP ageing and cash priorities

4

GST position and exception log

Topic 4 control checkpoint

A report is decision-ready only when its source data, parameters and review are evidenced.

Use evidence · preserve audit trail · escalate uncertainty

Illustrative Monthly Performance

REVIEW QUESTIONS

- What drives gross margin?
- Which expenses are unusual?
- Does profit convert to cash?
- Which action changes the trend?

Illustrative AR Ageing Profile

READ THE SHAPE

- Focus on material overdue balances
- Separate dispute from collection risk
- Assign owner and next action
- Reconcile total to AR control

Build and Interpret the SME Reporting Pack

BUSINESS OBJECTIVE

Generate, validate and interpret core financial and ageing reports.

DELIVERABLE

P&L, Balance Sheet, AR/AP ageing and management action summary.

Report parameters are consistent

Balance Sheet equation holds

Control accounts reconcile

Insights link to evidence and actions

Detailed procedure and evidence workbook: [activities/activity-09-financial-reporting-pack/](#)

Capstone: Complete the Month-End Close

BUSINESS OBJECTIVE

Complete a controlled month-end close for Orchid Bay Trading Pte Ltd and present a decision-ready management brief.

DELIVERABLE

Closed-period checklist, reconciliations, GST review, reporting pack and management brief.

All five control accounts reconcile

Seeded anomalies are found and resolved

GST and reporting packs are supported

Management brief contains evidence-backed actions

Detailed procedure and evidence workbook: [activities/activity-10-month-end-capstone/](#)

Topic 4 Recap

1

Profit and Loss explains performance over a period; Balance Sheet explains position at a date.

2

Cash flow, profit and working capital answer different management questions.

3

AR/AP ageing turns overdue balances into collection and payment priorities.

4

Report accuracy depends on reconciled source data, correct basis, period, filters and review evidence.

What You Achieved

1

LO1: Configure and import relevant data to the QuickBooks accounting system.

2

LO2: Input and control day-to-day sales, purchasing, banking and inventory data in QuickBooks.

3

LO3: Compute and review GST for expenses and invoices using appropriate Singapore tax codes.

4

LO4: Generate and interpret financial, accounting, ageing and GST reports for SME decisions.
